Israt Jahan

Mern-Stack Developer

Mobile: **+880 1733577248**

Address: Chattogram, Bangladesh

Email: **mnmnisrat@gmail.com || LinkedIn || GitHub**

Objective:

To secure a front-end developer position at a challenging and innovative company where I can use my skills in **React, React Query, Debugging**, **Deployment**, **Git** & **GitHub,** and other technologies to create engaging and user-friendly web applications.

Skills and Technologies:

- **Expertise:** Javascript (ES6) | React | Firebase (Authentication & Hosting) | JWT | Bootstrap | Tailwind CSS | DaisyUI | Flowbite
- **Comfortable:** Express.js | Rest APIs | MongoDB
- **Familiar:** Node.js | Next.js | PHP | Laravel
- **Tools:** Chat GPT | Visual Studio Code | NPM | Chrome DevTools | Netlify | Vercel | Figma
- **Interpersonal Skills:** Communication, Hardworking, Active Listening, and Collaboration

Projects:

1. Flavor Fusion: Live Link | Client | Server

- Flavor Fusion is a React **Single-Page Application** with Firebase authentication.
- In this project, there are two routes - Home and Blog - with a shared header and footer containing navigation links.
- There is a banner section, a numeric info section, a chef section featuring famous Turkish chefs, and a "View Recipes" button. Clicking the button redirects logged-in users to the specified chef's page.

Technologies: React.js | Tailwind | MongoDB | Vercel | Firebase.

2. Toy Quest: Live link | Client | Server

- Toy Quest is a **Full-Stack Application**. Here users will find a lot of features. Users can create accounts with their email and password or with Google.
- On the "Add Products" page, users can add new products to the database. They can also edit and delete their own products on the "My Products" page.

Technologies: React.js | Firebase | Express.js | MongoDB | Node.js | Tailwind.

3. Jazz Yoga Summer Camp: Live Link | Client | Server

- Jazz Yoga Summer Camp is a comprehensive **Full-Stack Application** featuring an admin, instructor, and student dashboard.
- Administrators have the authority to approve/deny classes, provide feedback and manage user roles, including promotions to admin or instructor.
- Instructors can seamlessly add, update, and delete classes according to their requirements.
- Users can easily create accounts, log in and gain access to a wealth of learning material.
- Students have the convenience of viewing and selecting available classes and upon successful payment, they can enroll in their preferred courses.

Technologies: React.js | React Query |Tailwind | Vercel | Firebase | Stripe | MongoDB | Node.js.

Education:

Ahsanullah University of Science & Technology
Bachelor of Architecture
Passing Year – 2017

Achievement:

Complete Web Development Course With Jhankar Mahbub

Language:

Bangla – ★★★★★ Native   English - ★★★★☆ Fluent
